JYOTI M BHADRASHETTI

Project Manager I Architect I LEED AP [BD+C]

[She, Her] I Bothell, WA I Jbhadrashetti@gmail.com I +14157129789

Construction Project Manager with 14+ years of experience delivering complex building projects across the US, UAE, and India, with expertise in GMP budgeting, procurement, cost control, and subcontractor management. Currently leading nine team members across two concurrent Seattle projects: a 114-unit affordable housing building and a 211-unit hotel conversion. Proven ability to optimize project costs and schedules while supporting sustainable construction practices. LEED AP.

Education:

Master's in Construction Management – University of Washington (March 2021-June 2022), USA.
Bachelor of Architecture – University of Mumbai (August 2007-April 2012), India. (Fulltime 5 years)

Work Experience:

Project Manager – SRM Construction, Inc. (Owner/Developer) Seattle, USA.

January 2023 – Present

- Lead a team of 6 on Altaire Queen Anne, a 114-unit affordable housing project in Seattle, across cost control, procurement, subcontractor management, and schedule. Both Altaire projects are in partnership with Seattle Office of housing, Amazon, and Department of Urban League.
- Lead a team of 3 on the Astro Hotel conversion, converting 211 units in an existing building to hotel units and short-term rentals listed on the Hilton website, coordinating design, subcontractors, and schedule.
- Led GMP budget development, GMP Contract formation, and preconstruction bid efforts, including scope packaging, bid solicitation, bid leveling, and subcontractor scope evaluation across multiple trade divisions.
- Executed project buyout and subcontractor procurement following GMP approval & loan closing, performing negotiations, scope alignment, and contract drafting. Achieved approximately 7% cost savings compared to the contractual budget.
- Managed project financials, including budget tracking, committed cost monitoring, and cost projections across divisions and phase codes to maintain proactive cost control.
- Achieved $7.5 million savings through the previous project at closeout. That was a market rate multi-family project with 178 units divided into two buildings in the capitol hill neighborhood of Seattle called 'Gridline Apartments'. The total project value was $101 million and was funded by bank draws along with an investor who shared ownership with SRM.
- Achieved $4.5 million savings through another project 'Altaire Jackson', which was a 207-unit, 8-story building with one level of garage, multifamily affordable housing project in Seattle. The total project value was $100 million. This project was completed 3 months before the contractual completion date.
- Spearheaded key project meetings namely, OAC meetings, monthly construction update owner meetings, and bank inspector meetings, fostering open communication and addressing project milestones and challenges proactively.
- Oversaw project billings comprising of subcontractor billing, reviewing pay applications (AIA G702/G703), retainage, lien waivers, change orders, and generating subcontractor change order and owner change orders.

Project Engineer – SRM Construction, Inc. (Owner/Developer) Seattle, USA.

April 2022 – December 2022

- Managed RFIs and submittals for all scopes in a multifamily new construction project in Seattle. Reviewed and streamlined submittals, created RFIs, on-site duties, coordination between all the trades, consultants, Architect, and the Owner.
- Played a pivotal role in project buyouts, negotiations, contract writing, and cost-effective material procurement.
- Provided valuable support in projecting committed costs for monthly owner update meetings.

- Excelled in project coordination, vendor management, and subcontractor coordination to ensure smooth operations and timely project delivery.
- Led safety inspections, facilitated permit renewals, reviewed subcontractor invoices to support monthly billing process, and managed the subcontractor change order review & approval.
- Successfully handled owner change orders, ensuring timely approval and seamless implementation.
- Played a key role in advancing sustainable building practices by integrating green design strategies and managing the ESDS certification process. Leveraged LEED AP expertise to promote environmental responsibility across multiple projects.

Pre-Construction Manager - JBC Design-Build LLC- Joga Ram Group, DUBAI.

August 2017–April 2019: Commercial fit-out, tenant improvement, and multifamily

- Played a vital role in site selection for some multifamily residential construction projects.
- Created an impact through business development and bagged 5 projects from new clients and 3 projects from repeated clients.
- Estimated building construction & Tenant improvement projects illustrated in the portfolio up to project value AED 12 million (USD 3.2 million) providing end-to-end solutions.
- Monitored, managed, and approved design changes in conjunction with Planning & Commercial Teams, ensuring program and cost effects as agreed.
- Managed Procurement of all finishes/materials to be used in the interior Fit out projects within budget.
- Finalized vendors / subcontractors for all scopes after negotiations generating an overall 15% rise in the project profits.

Project Manager - Apple Fit out Interiors LLC., DUBAI, UAE

August 2015 – July 2017: Commercial interior fit-out

- Chaired kick-off meetings and weekly progress meetings including project & client coordination.
- Managed design team and reviewed design program, deliverables, and cost parameters.
- Identified and managed third party involvement for special works, inspections & commissioning.
- Finalized vendors / contractors for all scopes after negotiations increasing project profits by 12-15%.
- Streamlined project delivery process for early deadline meet-ups, addressed RFI and submittals.
- Contributed to the business development with two projects of a total value AED 2.5 million (USD 700k)

Project Architect - Kapadia Associates Design LLP, MUMBAI, INDIA

Dec 2011 –July 2015:

- Created concept designs, its alternatives, DD & final IFC drawings in coordination with client and other stakeholders involved in the project.
- Chaired basis of design meetings with the owner to understand owner requirements.
- Performed site visits monthly to inspect the project progress and solve clashes if any.
- Liaised with onsite team and other consultants (MEP & structural) to resolve technical queries in design implementation of residential as well as commercial projects.
- Finalized finishes & specifications suitable for designs proposed.
